

TRAGEDY OF FLIGHT

A COMPREHENSIVE CRASH ANALYSIS

SOCIAL IMPACT:

- First responders from the Nepal Army and various police departments have been deployed to the crash site and are carrying out a rescue operation, the civil aviation authorities said in a statement.
- Human error could have caused Yeti Airline plane crash in Nepal last month that killed 72 people, investigators said in a preliminary report.
- There were two infants and 10 foreigners among the passengers. Only 71 bodies were recovered, with one passenger declared missing and presumed dead.

BUSINESS IMPACT :

- The mountains terrain of Nepal means that air travel is the only option to reach some places .Even with alternatives ,poor road infrastructure, short air travel ,and increased disposable income have led to a repaid increases in the number of air travelers .
- Investment in air travel infrastructure has also increased; last eight months ,two new international airports have started opertions.

- The Yeti Air crash has raised concerns over air safety in Nepal. The role of aircraft operators and pilots as well as equipments is under the scanner.
